

Broken Promises: Conflict-Related Sexual Violence Before and After the Cessation of Hostilities Agreement in Tigray

2024 · Tigray

Review of 305 medical records documenting patterns of sexual violence continuing after the November 2022 peace agreement.

The publication assesses documented medical evidence over time and places the findings in the context of post-agreement protection, survivor care and accountability needs.

This standalone preview includes a publication summary PDF generated for website review. Replace it with the final report file when the production document is available.
